LIVING

GENTIS LIVING

Extravagant combinations and expressive solo units

From a pure look to an extravagant mixture of materials: the Gentis living room range is based on modest forms and combines them with natural wood and high-quality leather. This mixture results in a range for lovers of design who require intelligent ways of combining the various units.

System units of matt or high-gloss lacquer in grey and white form the basis of Gentis. They can be employed flexibly as sideboards, lowboards, cabinets or wall units and provide a host of living room combinations. The sideboards and lowboards are particularly expressive in their form. They include rounded corner sections which achieve a particularly soft and harmonious effect; the single units are highlighted and appear to hover by the wall thanks to a functional frame with optional LED lamps. Alternatively, the lowboards and sideboards can also be fitted with a high-gloss chrome design sub-structure so that they determine the design of the living room in the form of stand-alone solitary units and elegant room dividers.

Leather and knotted wood versions create special accents

The accent units in Gentis were created to provide exclusive highlights. In high-quality leather and wood with a natural look, they provide an exciting contrast to the more modest lacquer system units and can be planned as shelf, floor or wall units. Manufactured in wood or leather, they underline the innovative strength and high level of craftsmanship typical of hülsta furniture. In the genuine leather units, the base units are provided with light upholstery in the form of leather covers from the hülsta collection. These units not only look most exclusive, their fine surfaces are also pleasant to touch. Wood versions in a knotted look are available as accent units. The rough character of the wood with its burls and knots becomes quite an extravagant eyecatcher and forms some exciting contrasts to the lacquer units. The outer glass sides of the (wall) cabinets in bronzed glass set the stage for another highlight - the rear wall in roughly brushed knotted natural oak. So the result is a used look together with true perfection.

The interior carcass of the versions pure white lacquer, white lacquer, high-gloss pure white lacquer and high-gloss white lacquer is in a matt white lacquer version. The same applies to the straight outer side of the lowboards with rounded end at one side.

The interior carcass of the versions grey lacquer, silk grey lacquer, high-gloss grey lacquer and high-gloss silk grey lacquer as well as of the accent units in leather version is in a matt grey lacquer version. The same applies to the straight outer side of the lowboards with rounded end at one side.

Leather versions: see next page!

Leather collection

Type of material Leather no.	Material identification Colour
Leather (51..)	100% Nappa leather, pigmented
5101	beige
5104	anthracite
5105	black
5106	red
5108	white
5109	cream

Important notes

Glass versions:

Outer glass sides of (wall) cabinets, **glass shelves** behind fronts as well as **bookshelves** and **glass accents** of wall shelf unit of bronzed glass.

Cabinet compartment rear wall and **bookshelf rear wall** of wall shelf unit also possible in all versions (exception: leather versions).

Accent units:

Carcase and front also in the versions knotted oak, knotted oak anthracite, knotted core walnut, Nappa leather, saddle leather and Nubuk-Touch leather possible.

Interior carcasse:

The interior carcasse of the versions pure white lacquer, white lacquer, high-gloss pure white lacquer and high-gloss white lacquer is in a matt white lacquer version. The same applies to the straight outer side of the lowboards with rounded end at one side. The interior carcasse of the versions grey lacquer, silk grey lacquer, high-gloss grey lacquer and high-gloss silk grey lacquer as well as of the accent units in leather version is in a matt grey lacquer version. The same applies to the straight outer side of the lowboards with rounded end at one side.

Standard interior fittings:

Fitted wooden shelves are fitted behind doors at intervals of 2 Raster (exception: 12 Raster cabinets).

Functional frame:

Functional frame always in white lacquer.

Wall units:

If units are planned as wall units, a wall bracket must be ordered.

Drawer frames in grey

Combinations of floor and wall units:

If floor and wall units are combined within an arrangement, there must not be any skirting boards in the room near the floor units, otherwise they must be removed.

Max. load:

Max. load of wooden and glass shelves (up to 70.4 cm width) as well as drawers: 25 kg
 Max. load of wooden and glass shelves (between 70.4 and 105.6 cm width): 15 kg;
 from 105.6 cm width: 10 kg
 Max. load of cover shelves: 35 kg per metre length for floor units.
 Please also note any maximum loads which may be stated in the type list for the individual units!

hülsta-Push-to-open:

Drawers and flap units with hülsta Push-to-open. All drawers on hidden roller bearings as fully pull-out units.

Labelling in type list drawings / assembly notes for wall units

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of base plates), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= base plates) is required, this is marked in the drawings in the type list with numbers in black boxes. Please be sure to note here the information and notes in the "Wall composition" chapter!

3

4

Notes on delivery

Notes on delivery:

The majority of the units are delivered standard as **fully connected units (glued)** so that the carcasse **cannot be disassembled**. There are however some **exceptions** to this rule:

Some carcasses are delivered as complete units but can be **disassembled into individual sections** in the final customer's home. These types are marked with a **1** in the type list.

1

Some carcasses are delivered in **individual sections** because of their size. These types are marked with a **2** in the type list.

2

The fronts with the number **2** are delivered separately and can therefore always be (dis-) assembled.

Wall fitting

Important notes: Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class C12/15. For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

Concept and possible arrangements

Unit as floor unit, with wall bracket for wall assembly or on metal substructure

Unit as floor unit
incl. 1.8 cm high plinth adjusters

Unit with wall bracket for wall assembly
If the unit is planned as a wall unit, a wall bracket must be ordered. In this case the plinth adjusters are omitted.

Unit on metal substructure
The units can be planned optionally on a metal substructure (19.4 cm high). In this case the plinth adjusters are omitted.

Notes on accent units, (wall) cabinets, wall shelf unit and 6 Raster wall units

Accent unit

Notes on accent units:
Carcase and front also in the versions knotted oak, knotted oak anthracite, knotted core walnut, Nappa leather, saddle leather and Nubuk-Touch leather possible. The inside carcass of accent units in leather version is in matt grey lacquer. If accent units are required in a leather version, the unit width increases by 1.6 cm.

Accent

Notes on wall shelf unit:
Shelves and partitions of bronzed glass; shelf rear wall of wall unit possible in all versions (exception: leather versions).

Accent

Notes on (wall) cabinets:
Outer glass sides of cabinets and glass shelves behind fronts of bronzed glass; cabinet compartment rear wall possible in all versions (exception: leather versions).

Notes on 6 Raster wall units:
6 Raster wall units are only available in the versions knotted oak, knotted oak anthracite and knotted core walnut. Glass compartment incl. integrated LED spotlamp. A remote control unit is essential for operation (against surcharge).

Functional frame

Functional frame

Functional frame for floor units of wood resp. for wall assembly of metal. Functional frame always in white lacquer.

The functional frame enables the following functions:

- Distance frame for a hovering look
- Inclusion of LED lamp
- Hiding cables

Unit with functional frame for floor units

The units can be planned optionally with a functional frame for floor units.

Unit with functional frame for wall assembly

If you plan a functional frame for wall assembly, you require an extra wall bracket. In this case the plinth adjusters are omitted.

Unit with functional frame on metal substructure

The units with a functional frame can be planned optionally on a metal substructure (19.4 cm high). In this case the plinth adjusters are omitted.

LED lamps for functional frame

LED lamps for functional frame

The functional frame can be fitted with an optional LED lamp. LED lamp incl. footswitch. Lamp switch optionally with a remote control unit possible (against surcharge).

LED lamp of the functional frame for floor units:

3-sided lighting

LED lamp of the functional frame for wall assembly:

4-sided lighting

3-sided lighting of functional frame for floor units

4-sided lighting of functional frame for wall assembly

NEW

Drawer and hinge-door for end units

Drawer and hinge-door for end units

The rounded end units of the low-, side- and highboards can optionally be fitted with drawers and/or hinge-doors.

Lowboard with end units with drawers

Sideboard with end units with hinge-doors

Suggested combinations

As an alternative to planning an individual unit from the complete range there is the possibility of choosing from specially suggested combinations. This eases planning. Incorporating accessories can enhance the suggested combinations. These are charged extra.

		<p>291 L 292 R -</p>

IR repeater set

<p>IR repeater set Infrared signal transmission set for operating media units behind wooden/lacquered fronts. You can operate all the units in one compartment with one set. The following applies:</p> <ul style="list-style-type: none"> • One set must be used in each compartment. 2 transmitters can also be installed in large compartments in order to increase performance. In this case only one additional transmitter needs to be ordered. • The transmitter must be placed in the direct vicinity of the receiver eye. • Transmittable IR frequency band 20 – 60 kHz • Up to 3 transmitters can be combined with one receiver. <p>It is possible to use 3 transmitters via 1 receiver including Master box. This enables simultaneous operation of 3 different furniture compartments or in critical situations it allows fitting out one furniture compartment with several transmitters in order to increase the performance in this compartment or to operate 2 end units placed next to one another.</p> <p>The IR repeater set consists of:</p> <ul style="list-style-type: none"> • 1 receiver eye (Ø 3.0 cm) incl. standing bracket • 1 electrical transmitter • 1 plug EVG 12 V • Cable clips <p>Please note the details stated in the operating instructions!</p>	<table border="1"> <tr> <td data-bbox="1333 645 1523 764"> <p>IR repeater set 1 receiver eye and 1 transmitter incl. standing bracket</p> </td> </tr> <tr> <td data-bbox="1333 764 1523 883"> <p>2001 -</p> </td> </tr> <tr> <td data-bbox="1333 883 1523 934"> <p>Extra transmitter</p> </td> </tr> <tr> <td data-bbox="1333 934 1523 1040"> <p>2003 -</p> </td> </tr> </table>	<p>IR repeater set 1 receiver eye and 1 transmitter incl. standing bracket</p>	<p>2001 -</p>	<p>Extra transmitter</p>	<p>2003 -</p>

Cable apertures / subwoofer base cut-out section

	<p>Cable aperture K1 silver-coloured; Ø 8.0 cm It is possible to fit a cable aperture in the top shelf of the lowboard. The cable aperture can be made at the rear of the top shelf. The position is in the centre of the compartment, distance from centre of aperture to rear edge of unit: 10.0 cm.</p>	<p>K1 -</p>
	<p>Cable aperture K2 silver-coloured; Ø 8.0 cm It is possible to fit a cable aperture in the rear wall of the lowboard. Positioned at centre of compartment.</p>	<p>K2 -</p>
	<p>Cable aperture K7 silver-coloured; 7.0 x 12.0 cm It is possible to fit a cable aperture in the top shelf of the lowboard. The position is in the centre of the compartment, flush with the rear edge of the unit.</p>	<p>K7 -</p>
	<p>Cable aperture K8 silver-coloured; 12.8 x 3.2 cm It is possible to fit a cable aperture in the top shelf of the lowboard. The cable aperture can be made at the rear rim of the top shelf. Positioned in centre of compartment.</p>	<p>K8 -</p>
	<p>Cable aperture K9 13.0 x 1.6 cm It is possible to fit a cable aperture in a fitted shelf. The cable aperture can be made at the rear rim of the fitted shelf. Positioned in centre of compartment.</p>	<p>K9 -</p>
	<p>Cable aperture K20 silver-coloured; Ø 8.0 cm It is possible to fit a cable aperture in the partitions of the lowboard.</p>	<p>K20 -</p>
	<p>Subwoofer base cut-out section Base cut-out section 12 x 23.2 cm The sounds from the subwoofer pass out through the base cut-out section in the lowboard without hindrance. The exact position in the carcass is predetermined ex-works and cannot be altered.</p>	<p>14 -</p>

TV columns

TV columns can be rotated and adjusted in angle, for fitting on **floor lowboards with partition** (not possible with 2 Raster lowboards with 2 drawers on top of one another and wall lowboards).
The TV column can only be fitted above a partition in the centre. The partition is provided with a cut-out section for cables (no surcharge). No drawers are possible below the TV column.

The revolving TV column 52 is suitable for flat screens with a screen diagonal of 38"-52" (96-132 cm), max. load: 35 kg
TV revolving column 52 compatible with VESA Norm standard:
min. 75 x 75 mm, max. 400 x 400 mm

The revolving TV column 65 is suitable for flat screens with a screen diagonal of 38"-65" (96-165 cm), max. load: 40 kg
TV revolving column 65 compatible with VESA Norm standard:
min. 75 x 75 mm, max. 800 x 400 mm

Column system, flat screen supports

Column system

consisting of a metal column (for fitting anywhere on wall) and of audio/DVD support(s), for fitting anywhere on column.

Example of use:

Columns

of metal; for fitting anywhere on walls above top rim of plinth slot; cables can be laid and hidden at any height; audio/DVD supports can be fitted anywhere on the column.

36.8 cm high

64.1 cm high

9201

9202

Audio/DVD support

of metal; can be positioned at any height on the column and be adjusted to suit audio/DVD players of any size; with rubber padding at front to prevent units from slipping; max. load: 10 kg

9203

Flat screen support WTL6

The flat screen support can be adjusted 3-dimensionally. It is suitable for flat screens with a screen diagonal of 102-216 cm (40"-85"); max. load: 45 kg.
Suitable for Curved TV's.
Flat screen support compatible with VESA Norm standard:
min.: 200 x 200 mm
max.: 600 x 400 mm

for fitting anywhere on walls

9704

Flat screen support THIN 345, ideally adaptable

The flat screen support can be adjusted 3-dimensionally. It is suitable for flat screens with a screen diagonal of 81-140 cm (32"-55") and a maximum depth of 4.5 cm; max. load: 25 kg.
Go to www.vogels.com to check if your flat screen can be fitted on this flat screen support. Enter the name THIN 345. After a few steps you can see if your flat screen TV is compatible with the flat screen support.
Not suitable for Curved TV's.
Flat screen support compatible with VESA Norm standard:
min.: 100 x 100 mm
max.: 600 x 400 mm

for fitting anywhere on walls

9304

Flat screen support THIN 315

The flat screen support can be angled up to a max. 15°. It is suitable for flat screens with a screen diagonal of 102-165 cm (40"-65") and a maximum depth of 5.0 cm; max. load: 25 kg.
Go to www.vogels.com to check if your flat screen can be fitted on this flat screen support. Enter the name THIN 315. After a few steps you can see if your flat screen TV is compatible with the flat screen support.
Not suitable for Curved TV's.
Flat screen support compatible with VESA Norm standard:
min.: 100 x 100 mm
max.: 600 x 400 mm

for fitting anywhere on walls

NEW

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

DINING

hülsta offers a room concept to meet all requirements in comfort, beauty of form and attractiveness with a comprehensive collection of dining room tables and chairs.

The **dining tables** in a wide variety of sizes (with and without pullout function) in all wood surface versions and in contemporary designs, as well as the **dining chairs** that can be combined individually using different armrests, comfort features, high-grade cover fabrics (leather, textiles) and metal surfaces can all be found in the **"DINING"** type list.

Coffee tables CT 160

Coffee tables CT 160

The **CT 160 coffee table** in sizes of 80 x 80 cm and 110 x 80 cm offers three different plinth versions. The bottom shelf is veneered, lacquered or in knotted wood, the top section is of glass, in one of four optional glass versions.

You will find the coffee table CT 160 as well as other coffee tables in the **"Coffee tables"** type list.

Coffee tables

Coffee tables

hülsta offers a comprehensive **collection of coffee tables**, which not only match the hülsta furniture ranges perfectly but can also be combined with other products that are available on the market. You will find these coffee tables in a number of designs, sizes and versions in the **"Coffee tables"** type list.

Cable apertures

It is possible to provide the cover shelves, side sections, shelves, etc., in units from nearly all the hülsta living room ranges with cable apertures so it is easier to feed cables of electronic equipment through these units. There are four different types of cable apertures to choose from, as listed here. **Please be sure to follow the important notes.**

Cable aperture K1

Cable aperture for 80 mm hole, silver colour
Standard cable aperture; particularly suitable for cover shelves, side sections and shelves

Sizes:
Assembly height: 21 mm
Outside diameter: 92 mm
Inside diameter: 74 mm
Diameter of hole: 80 mm

K1

Cable aperture K2

Cable aperture for 80 mm hole, silver colour
particularly suitable for rear walls and side sections

Sizes:
Assembly height: 8 mm
Outside diameter: 92 mm
Inside diameter: 74 mm
Diameter of hole: 80 mm

K2

Cable aperture K3

Cable aperture for 60 mm hole, silver colour
particularly suitable for shelves and constructional shelves (suitable to an extent for scart cables)

Sizes:
Assembly height: 21 mm
Outside diameter: 72 mm
Inside diameter: 54 mm
Diameter of hole: 60 mm

K3

Cable aperture K20

Cable aperture for 80 mm hole, silver colour
particularly suitable for side-panels and centre partitions

Sizes:
Assembly height: 2x 8 mm
Outside diameter: 92 mm
Inside diameter: 74 mm
Diameter of hole: 80 mm

K20

IMPORTANT NOTES Please be sure to note!

Please be sure to state the **exact position** of the cable aperture in your order (always measure distances from the centre of the cable aperture). For **wall units** the cable aperture is only possible in the bottom position (due to the suspension brackets). With **cover shelves**, the position of the cable aperture is determined in the factory, in accordance with factors specific to the given range. The same applies to technical exceptions because of custom-based planning. The K 20 is positioned in the centre (depthwise) in the **side-panel**. Please state the exact height (centre of hole of cable aperture from bottom rim of side-panel)! Subject to technical progress.

The **minimum distance** for the cable aperture (measured from the inside): 100 mm from the side and 70 mm from the rear (for horizontal surfaces) or 100 mm from the side and 70 mm from the base (for vertical surfaces). Please state if the aperture is to be fitted at the left, at the right or in the centre.

Standard position: If no details of the exact position of the cable aperture are given in your order, the cable aperture is always fitted at the bottom centre or at the rear centre of the relevant surface, whereby the distances stated above still apply.

Caution! Please note that the cable aperture can not be fitted where there is an integrated or front spotlight, centre partitions or a split rear wall. **Please be sure to observe the following explanatory diagrams!**

for vertical surfaces

for horizontal surfaces

Minimum distance

100 mm from the side and 70 mm from the base

Minimum distance

100 mm from the side and 70 mm from the rear

Standard position

at the centre of the surface and 70 mm from the base

Standard position

at the centre of the surface and 70 mm from the rear

Please note!

If there is an integrated or front spotlight in a shelf, for example, the cable aperture cannot be fitted at this position!

Please note!

If there is a centre partition, for example, between two shelves, the cable aperture cannot be fitted at this position!

GENTIS

Special-sized products are possible on request.
Please get in touch with your customer advisor.

Special articles

Cover panels

for side and top panelling of fitted wardrobes (support construction and fitting materials must be acquired on site).

Basic price per order	9901	-

Special colours; Note on „Blue Angel“ / Emissions label of DGM

Special colours

All the hülsta lacquer colours are possible for nearly all the hülsta ranges. Availability and prices on request.

Note on „Blue Angel“ (RAL-UZ 38) and Emissions label of DGM (Class A)

It is possible that the requirements of the „Blue Angel“ and the DGM Emissions Label cannot be met by some of the lacquer colours in price groups II and III (see here the different lacquer versions in the NURIA range), depending on the colour mix (surface ratio of these colours in the corresponding order). However, the legal requirements are definitely met in all cases!

Switch options for lamps: Radio remote control with change of colour temperature

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

The following points must be noted with the radio remote control:

- The receiver must be positioned behind a rear wall or under plinth shelves (at least 20 mm space required under plinth shelves).
- The total wattage power of all lamps included per receiver must not exceed 30 W.
- 4 channels = 4 light groups
- 1 light group = x lights
- All lamps within a light group can be dimmed to the same brightness.
- The change of the colour temperature takes place for all lamps in all light groups.
- The radio remote control is not suitable for equipment operating on 110 V.

Please be sure to note the operating and programming instructions!

4-channel radio remote control with change of color temperature

4-channel radio remote control with change of color temperature

Type	2119	-
------	------	---

Examples of use (schematic diagrams)

Example 1

Lights inside a unit

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps in the open compartment

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp in the right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Example 2

Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp and the LED light panels in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps and the LED light panels in the centre cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp and the LED light panels in the right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Example 3

Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamps in the left, centre and right cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the top LED light panels in the left, centre and right cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the bottom LED light panels in the left, centre and right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Important notes

Wall composition / assembly instruction

Important notes:

The composition of walls must be ascertained before concluding a contract and be checked by a qualified fitter before assembly takes place.

Assembly may only be carried out by a qualified fitter under careful observation of the assembly instructions.

The plastic Rawl plugs supplied by hülsta as a standard set are only suitable for concrete \geq C12/15, if the wall composition and compression strength corresponds to the table below. Under no circumstances must a unit be assembled on light masonry.

Furthermore, we provide a mounting set with assembly mortar for the types of walls listed below (see assembly mortar set below). Again, assembly must be carried out by a qualified fitter under careful observation of the wall composition and assembly instruction. The compression strength levels stated below must be met under all circumstances.

Materials table

with a description of which sets are to be used with the following types of walls:

Standard set	Assembly mortar set only suitable for the materials stated below!	
Concrete C12/15 Compression strength \geq 15 N/mm ² 	 Building bricks Mz 12 Compression strength \geq 12 N/mm ²	 Solid blocks of light concrete V2 Compression strength \geq 2 N/mm ²
	 Limestone blocks KS 12 Compression strength \geq 12 N/mm ²	 Perforated blocks of light concrete Hbl 2 Compression strength \geq 2 N/mm ²
	 Perforated sand lime bricks KSL12 Compression strength \geq 12 N/mm ²	 Aerated concrete PP2 Compression strength \geq 2 N/mm ²
	 Vertically perforated bricks HLz 12 Compression strength \geq 12 N/mm ² Bulk density \geq 1.0 kg/dm ³	

A different and more suitable type of mounting must be chosen by a qualified fitter in all other cases. hülsta cannot accept any responsibility for the choice of any other types of mounting! Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units.

Mounting sets

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of support boards), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= support boards) is required, this is marked in the drawings in the type list with numbers in black boxes. Every support board requires four mounting screws.

- 3 = 3 support boards
- 4 = 4 support boards, etc.

One **assembly mortar set** is sufficient for up to a maximum of 3 support boards or 4 wall side-panels.

Important note: Depending on the composition of the wall (see wall types illustrated above), assembly must be carried out using the special assembly mortar set and a standard trade mastic tool which are the basic essentials for safe and clean workmanship.

Standard set

The standard set consists of 4 plastic Rawl plugs and 4 mounting screws and is sufficient for 1 support board. The standard sets are included in the packet of fittings to match the number of support boards.

Assembly mortar set for up to a maximum of 3 support boards consisting of:

- 9x injection retaining sleeve
- 9x screw-in sleeve
- 1x injection cartridge
- 2x static mixer
- 1x assembly instructions

Please use the mounting screws from the standard set (supplied free of charge).

Example of order:

- Add up number of support boards for all existing unit types
 - Divide the sum by “3”
 - Round up the result to a full number
- = Number of assembly mortar sets required

hülsta Planning Service

Lots to do? A customer wants his project finished and you haven't got enough time? Or the project is so complex that it will take too much time?

This is exactly the kind of situation we created the hülsta Planning Service for. hülsta's employees create the required project for you at short notice. Based on your information, we implement the project perfectly with all views and a complete order list ready for immediate forwarding to the customer.

The hülsta check list (available at <https://www.huelsta.com/einrichtungsberatung/>) makes it all really easy for you. You won't forget anything with this list and the customer receives a project he will be thrilled about as quickly as possible.

hülsta Planning Service

Tel.: +49 (0) 2563 / 86-1060

Fax: +49 (0) 2563 / 86-1000

Workdays from 8.00 a.m. until 6.00 p.m.

Special wishes? Come to us!

Maximum individuality! – Maximal flexibility! – hülsta makes most of your special wishes possible.
And if you do have a wish which is not quite so easy to implement, just give us a call or send us a mail or a fax. We have our own hülsta "Special Wishes Team" who are there to help you realise just these customer requests. These colleagues are professionals when it comes to special products. They plan and calculate the products possible for you and even develop an alternative suggestion if the idea should turn out to be technically impossible.

Here is an overview of the hülsta range of special wishes:

- A lot of special products can be ordered simply via the type list
- Special-sized products are planned simply and professionally
- Competent colleagues advise you by phone, by fax and by mail
- You will be sent alternative suggestions if the idea is technically impossible
- Many special-sized products are available without a surcharge
- Specially qualified carpenters and technicians implement your plans perfectly
